AMES, a TAB Company - Launches TAB FusionRMS™ and Expands Software Solutions

MAYVILLE, WI—October 5, 2010—TAB Products Co LLC (<http://www.tab.com>) a global leader in records management products and services, and AMES, a TAB Company, announced the official launch of TAB FusionRMS software solutions. The TAB FusionRMS suite includes a number of records management focused software solutions for capturing, managing, tracking, serving, and protecting both physical and electronic records.

“Enhanced software solutions are a critical component to help solve today’s records management challenges,” said Bill Graham, President of TAB. “The TAB FusionRMS product suite will further enhance TAB’s existing software offerings and will be particularly useful for organizations that want to track both their electronic and physical records in a single comprehensive solution.”

TAB FusionRMS Encompasses a Spectrum of Products

The TAB FusionRMS is a comprehensive suite of software solutions ranging from entry level tracking to advanced imaging solutions, designed to track physical and electronic records with enhanced security and workflow. Products include:

- TAB FusionRMS Essential
- TAB FusionRMS Physical Recordkeeping
- TAB FusionRMS Physical Property and Evidence Room Management
- TAB FusionRMS Physical Inventory Management System
- TAB FusionRMS Electronic Recordkeeping
- TAB FusionRMS Enterprise System for Government
- TAB FusionRMS Enterprise System for Case File management
- TAB FusionRMS Enterprise System for Human Resources
- TAB FusionRMS Enterprise System for Property and Evidence
- TAB FusionRMS Enterprise System for Clerks and Registrars
- TAB FusionRMS Enterprise System for Health and Human Services

“This expanded TAB offering presents a number of exciting new opportunities for new users and existing TAB clients,” said Billy Mitchell, Director of Technology Products and Services for TAB. “TAB’s records management solutions are already in use by hundreds of businesses, government agencies and law enforcement agencies. Globally, all clients will benefit from the additional availability of the TAB

FusionRMS products seamlessly integrating with existing TAB solutions.”
